

WALKING **TRACK** SYSTEM

PRODUCT
CATALOGUE

SURFACE THAT
OUTLASTS THE RUN

ABOUT **US**

Orthotrack is a specialist surfacing brand engineered around one proposition: a walking and jogging track that's genuinely gentler underfoot, easier to maintain, and built to last designed from the ground up for an active adult audience whose joints, balance and daily routine matter more than personal-best times.

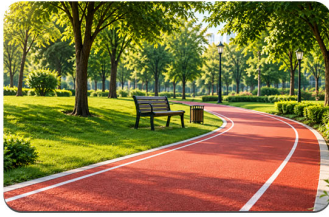

Every Step **Counts**

Turn every step into a healthier, happier life with Orthotrack

IDEAL **FOR**

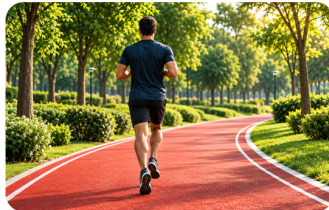

Parks

RWA & Communities

Wellness Arenas

Walking Tracks

Schools & Campuses

Engineered **for Every Step**

Premium Cushioning

Superior Grip

Lasting Performance

KEY **BENEFITS**

Engineered for comfort. Designed for a healthier, more active you.

Less Joint
Impact

Improves
Heart Health

UV Stable
Colors

Low
Maintenance

Weather
Resistant

BUILT FOR
A BETTER YOU

SCIENCE IN EVERY STEP

IMPROVED CARDIO HEALTH

Regular walking & running boosts heart health.

BETTER POSTURE

Encourages natural alignment & spinal health.

LESS KNEE PAIN

Cushioned surface reduces stress on joints.

STRONGER MUSCLES

Even surface support helps build strength effectively.

30%

LESS IMPACT
ON JOINTS

20%

BETTER CARDIO
EFFICIENCY

25%

REDUCTION IN
STRESS LEVELS

TWO SURFACES

A CLEAR DIFFERENCE

ORTHOTRACK

TRADITIONAL WALKING TRACKS

CUSHIONED COMFORT

Reduces impacts on joints

JOINT SAFETY

UV STABLE COLORS

No yellowing. Looks new for years

DURABILITY

EASY TO CLEAN

Smooth surface, dirt doesn't settle.

CLEANLINESS

QUICK RECOAT

Refreshes easily, looks new

MAINTENANCE

LOW MAINTENANCE

Simple care, long life

LONGEVITY

BETTER VALUE

Higher performance
Lower lifetime cost

VALUE

HARDER IMPACT

More stress on joints

FADING COLORS

Prone to fading and dullness

TRAPS DIRT

Open texture holds dust, moss & algae

HARD TO MAINTAIN

Patches are visible

SHORTER LIFESPAN

Wear out faster

HIGHER COST

Costly installation and maintenance

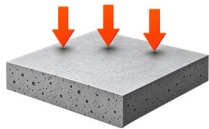

Technical Data Specifications

PROPERTY	SPECIFICATION / STATUS
SYSTEM TYPE	Multi-layer cushioned walking surface
PRIMARY APPLICATION	Outdoor walking tracks / wellness paths
INTENDED ACTIVITY	Walking and light recreational activity
CUSHION LAYER	15mm SBR shock-absorbing cushion
FINISH	Coloured seamless coated finish
SURFACE TEXTURE	Smooth to textured; project dependent
COATING TECHNOLOGY	Water-based coating technology
SUBSTRATE	Prepared concrete / suitable existing walking-track substrate
SLIP RESISTANCE	<i>Test value to be established</i>
IMPACT ATTENUATION	<i>Test value to be established</i>
ABRASION RESISTANCE	<i>Test value to be established</i>
UV / WEATHER RESISTANCE	<i>Test value to be established</i>
VOC	<i>Test / SDS value to be established</i>
SERVICE LIFE	<i>To be determined from testing and project conditions</i>

System Construction

THE SIX-LAYER BUILD-UP

Each layer performs one job adhesion, cushioning, pore-filling, refinement, protection or finish so the finished surface performs as a system, not a single product.

PREPARED SUBSTRATE + PRIMER

Establishes the adhesion interface and helps consolidate residual surface dust and loose particles.

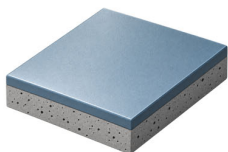

15MM SBR SHOCK-ABSORBING CUSHION

The confirmed system feature a genuine 15mm primary resilient cushion layer, not a thin coating.

PORE-FILLING & CUSHION COATS

Progressively fills surface voids and consolidates the granular SBR structure ahead of finishing.

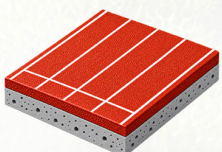

SURFACE LEVELLING / REFINEMENT

Refines the surface profile and establishes a more uniform plane before the wear surface is applied.

PROTECTIVE TOP-COAT STAGE(S)

Builds surface protection and durability, contributing to the final finish.

FINAL COLOURED / WEAR FINISH

The walking wear surface colour and engineered texture / slip resistance, finalised per project
